

Vaccine Research Center Seminar Series

Winter 2003

Tuesdays at 4 pm (except as noted)
Building 40 (VRC), Room 1203

- | | | |
|-------------|--|--|
| 1/14 | Robert Seder
Vaccine Research Center, NIH | <i>Mechanisms controlling Th1 memory cell differentiation: implications for vaccine development against intracellular infections requiring cellular immune responses</i> |
| 1/21 | Mario Stevenson
University of Massachusetts | <i>Functions of primate lentiviral Nef proteins</i> |
| 1/28 | Warner Greene
Gladstone Institute | <i>New insights into the pathogenic interplay of HIV with its cellular host</i> |
| 2/4 | Michael Lederman
Case Western Reserve | <i>Qualitative and quantitative immune deficits in HIV infection. Does where you were determine where you are?</i> |
| 2/18 | Bob Johnston
University of N. Carolina | <i>Alphavirus vaccine vectors: their biology and use against HIV</i> |
| 2/25 | Jean Stephenne
GlaxoSmithKline Biologics | <i>TBD</i> |
| 3/4 | Leo Lefrancois
Univ. Connecticut Health Ctr | <i>Migration and function of non-lymphoid effector and memory T cells</i> |
| 3/11 | Genoveffa Franchini
National Cancer Institute, NIH | <i>Skewing of dominant responses in macaques immunized with multigenic vaccines</i> |
| 3/18 | John Shiver
Merck | <i>Comparison of viral vector approaches for HIV-1 vaccine development</i> |
